THE GENERAL ESTIMATOR *SUITE*

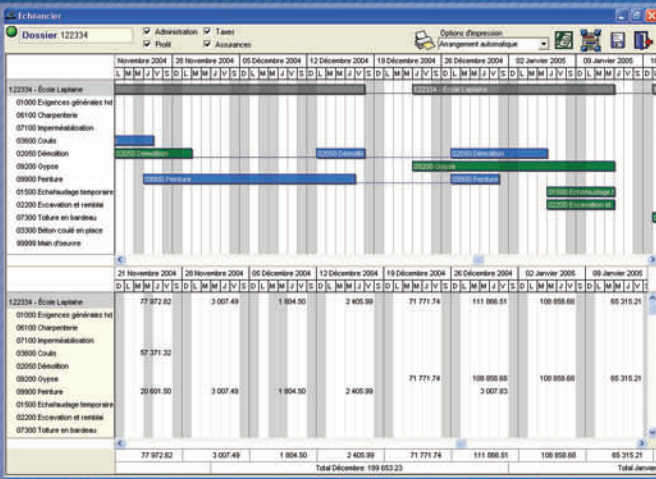

THE GENERAL ESTIMATOR is an estimating software suite designed for the tasks and needs of the construction estimator and integrates a series of useful tools such as :

- Management of general conditions, professionals and sub-contractors
- Possibility to import existing database
- Transmit your invitations to tender by fax and/or e-mail
- Module for detecting errors and omissions
- Flexibility of choice between an estimated price and a sub-contractor's price
- Comparison and analysis of similar projects
- Summarized and detailed cost breakdown
- Automatic compilation of quantities and required conversion
- Compile assemblies costs and cost breakdown according to specifications sections
- Supplied with a catalogue of material and labour rates for more than 7500 elements
- Multi-catalogue concept allowing to import your suppliers price lists
- Export of reports to format CSV, XML and TXT
- Network usage capability

For a demonstration, please contact our team of experts

(514) 351-7625 | 1 866 351-7625 | www.estation.ca | info@estation.ca

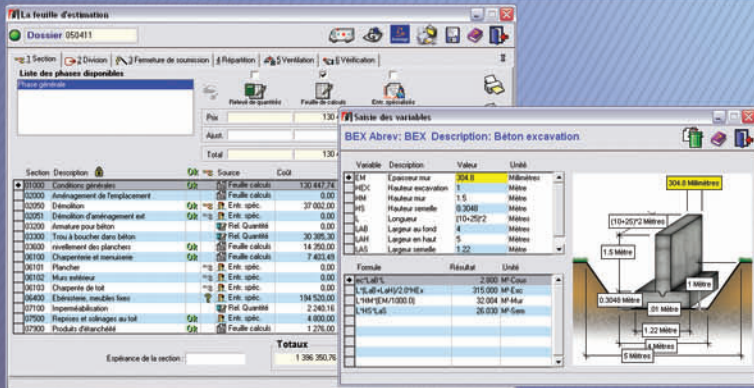

A comprehensive solution for estimators and construction professionals

Integrated construction schedule and job disbursement ledger

THE GENERAL ESTIMATOR can be connected to a digitizer

The flexibility of THE GENERAL ESTIMATOR is exceptional and you can modify the image bank with your own visual diagrams

Compatible with the site www.lecatalogue.ca which includes material and labour prices of more than 7500 elements

Le CATALOGUE.CA
La référence des coûts de la rénovation et construction!
